MAN WHO HAS IT ALL
Parody gender equality Twitter account has proved a big hit

"A successful career? Children? Perfect hair? I don't know how he does it..." said no one, ever. The idea that men might have to juggle to maintain that precious work/life balance is rarely talked about. Which is why a parody Twitter account – Man Who Has It All – has hit such a nerve.

The Man is a "working dad" (now there's a phrase you don't hear every day) dishing out 140-character nuggets of advice for "man juggling a successful career and fatherhood". By flipping genders, he reveals how ludicrous the tips offered by women's mags and lifestyle blogs are: "Dad with a career? Beat stress by stacking on veggies, teaming up with other dads & dressing for your face shape". He also highlights the sexism in statements that are supposedly supportive of women, but which would never be said of a man: "CONGRATULATIONS to all male EU leaders for getting there on merit alone. Very well done all of you." But he's best when he skewers comments many women make about their other halves: "My wife is very much a 'HANDS-ON-MUM'. I'm so lucky. She even changed their nappies when they were little."

The Man Who Has It All (pictured) reveals that a gender bias in childcare and housework remains. Women are the main breadwinners in four homes out of 10, yet we are a long way off domestic democracy. Seventy per cent of all housework in the UK is done by women and middle-class men are most reluctant to lift a finger (or duster).

"Women are still working what Arkie Hochschild called "The second shift" back in 1989," explains occupational psychologist Almuth McDonall. "I expected the gender difference to be smaller in couples where both partners worked full-time, but it was even bigger. I think this is because the working mothers felt guilty, so they had to do even more."

So who is this mysterious man? In his bio he claims to be a "frazzled working dad with a wife and three kids who spends his 'me time' on Twitter." When asked for an interview for this newspaper, he said he was "too busy juggling savoury yoghurts, kids' sportswear, healthy-looking skin, a career & pasta salads" to answer my questions.

The Man Who Has It All says: "If I can help one man stay hydrated, I'll be a happy man", but maybe it's more than a joke. If the popularity of this account encourages one father to step up his share of childcare, or challenges one woman to realise she might not be "very lucky" to have a man who "helps with the kids on weekends", then we might all be "#Blessed".

Task 2

- In this article about English Renaissance dramatists some parts of sentences have been left out.
- Your task is to reconstruct the text by filling in the gaps from the list.
- Write the letters (A-L) in the white boxes next to the numbers (9-16) as in the example (0).
- There are two extra letters that you will not need.

CHRISTOPHER MARLOWE CREDITED AS ONE OF SHAKEPEARE'S CO-WRITERS

The long-held suggestion that Christopher Marlowe was William Shakespeare is now widely dismissed, (0) ________ . But Marlowe is enjoying the next best thing – (9) ________ with a credit as co-writer of the three Henry VI plays. The two dramatists will appear jointly on each of the three title pages of the plays within the New Oxford Shakespeare, (10) ________ .

Using old-fashioned scholarship and 21st-century computerised tools to analyse texts, the edition’s international scholars have contended that (11) ________ was far more extensive than has been realised until now. Lead researcher Gary Taylor told the Guardian: “The orthodox view was that Shakespeare didn’t collaborate at all. What has happened in the past two or three decades is that (12) ________ that we underestimated the amount of Shakespeare’s work that’s collaborative.”

Taylor said these editions of the Henry VI plays are the first (13) ________ . “We have been able to verify his presence in those three plays strongly and clearly enough,” he added. The findings shed new light on the supposed rivalry between Marlowe and Shakespeare. Taylor added: “We can now be confident that (14) ________ . Rivals sometimes collaborate.”

Decisions about authorship have been supported by (15) ________ . The researchers believe that computerised textual analysis is now so sophisticated that they can even distinguish between Shakespeare writing under Marlowe’s influence and Marlowe writing alone. Taylor acknowledges that (16) ________ : “You can’t say anything about Shakespeare without somebody disagreeing with you, but our knowledge of the past increases by debate of this kind.”

(guardian.co.uk)
The accumulation of new scholarship, techniques and resources has made it clear that Shakespeare’s collaboration with other playwrights along with other authorship theories may still be cast on their conclusions. They didn’t just influence each other; they never worked with each other. A landmark project to be published this month aims to bring the author’s identity into question. The contributions of Marlowe are also being identified.
Task 3

- Read through this article about a new craze and then read the multiple-choice questions (17-21) following it.
- Your task is to choose the alternative (A-D) that best corresponds to what the text says.
- An example (θ) has been given for you.

TODAY'S HIPSTERS ARE FLOCKING TO MEDIEVAL MEAD LIKE BEES TO HONEY

There have been many baffling food trends over the past couple of years, but none is quite so odd as the comeback of mead. I say comeback, but that suggests mead had slipped off the radar for a couple of years. In fact, the last time the drink was truly fashionable was in the 9th century.

Mead, made using fermented honey, is probably the oldest known alcoholic drink, whose origins stretch back 9,000 years. It is referenced in Chaucer and frequently in the old English epic poem Beowulf, where Viking warriors tended to go looting and burning villages after getting drunk in the mead hall.

But after a good 600 years of falling off drinks menus in taverns in favour of beer and wine, mead is back with a zing. According to the American Mead Makers Association, sales went up 42 per cent last year. In the UK, Cornish Mead said sales had gone up 15 per cent in recent weeks alone.

Various people have suggested that Game of Thrones, the cultish television programme set in the futuristic and yet medieval kingdoms of Westeros and Eosos, is responsible. The characters certainly drown goblets of intoxicating liquor, but mead is never actually mentioned in the programme or in the original Game of Thrones books.

The cause of mead's sudden popularity are hipsters, those bearded young urbanites who, having helped launch cereal-only cafés, have found mead as the next novelty drink after craft beer. In the endless quest for the new, mead is a perfect candidate with its unique flavour of fermented honey.

Mead's cause has also been helped by a general move towards "authenticity" in food and drink. People are far more interested in traditional methods of food production, which also explains the rise of sourdough bread and the whole slow food movement. At various real ale festivals there are now dedicated mead bars, displaying a wide range of this low-alcohol drink from the sickly sweet to the semi-dry.

**DID RICHARD III KILL THE PRINCES IN THE TOWER?**

Locked in the Tower in June 1483 with his younger brother, the 12-year-old Edward V – king of England for 86 days after his father's sudden death – was certain that "death was facing him." Two overthrown kings had died in suspicious circumstances already that century. Yet it was still possible their uncle, Richard III, who had seized the throne, would spare them. The princes were so very young, and if it was accepted that they were illegitimate, as their uncle claimed, they would pose little threat.

The innocent Richard, Duke of York, only nine years old, remained "joyous" and full of "frolics", even as the last of their servants were dismissed. But the boys were spotted behind the Tower windows less and less often, and by the summer's end they had vanished without a trace.

It is the fact of their disappearance that lies at the heart of many conspiracy theories over what happened to the princes. Murder was suspected, but without bodies no one could be certain even that they were dead. Many different scenarios have been put forward in the years since. In the nearest surviving contemporary accounts, Richard III is accused of ordering their deaths, the boys having been either suffocated or drowned. Other theories suggested that one or both of the princes escaped.

In more modern times, some have come to believe that Richard III was innocent of ordering the children's death, and instead spirited his nephews abroad or to a safe place nearer home, only for them to be killed later by Henry VII, who feared the boys' rival claims to the throne. None of these theories, however, has provided a satisfactory answer to the difficult problem at the heart of this mystery: the fact that the boys simply vanished.

Henry VIII's chancellor, Thomas More, claimed he had been told the murdered boys were buried at the foot of some stairs in the Tower. In 1676, long after the passing of the Tudor dynasty, two skeletons, judged to be of young children, were recovered in the Tower, in a place that resembled More's description of the princes' first burial place. They were then interred at Westminster Abbey, not far from where Henry VII lies.

*BBC History Magazine*

The princes were kept in (25) _________ but when they were no longer seen, people became (26) _________ of Richard. THE ART OF FORGERY

In his new book *The Art of Forgery*, art (0) ________ (history) Noah Charney explores how the best (10) ________ (forge) in the world managed to fool many experts. Here, he reveals that Michelangelo was one of them.

Before anyone had heard of Michelangelo Buonarotti, the most (11) ________ (value) sculptures on the Renaissance Italian art market were ancient Roman marble statues. Several (12) ________ (biography) records demonstrate that even an artist as great as Michelangelo could be involved in (13) ________ (intention) forgery, setting out to create an “ancient Roman statue” of his own. It did nothing to ruin his (14) ________ (repute). Indeed, having successfully passed off his work as a Roman statue helped the beginning of a(n) (15) ________ (believe) career, by showing that Michelangelo had the technical skill and (16) ________ (create) genius to match his ancestors.

Michelangelo carved the marble statue *Sleeping Eros* in 1496, when he was only 21 and, according to renowned historian Paolo Giovio, doctored it in order to make it appear to be ancient. The statue was sold to Cardinal Raffaele Riario, a great (17) ________ (collect) of early Roman antiquities.

When Riario later found out that he had bought a forgery, he returned the statue to the dealer from whom he had bought it. However, in the meantime, Michelangelo had gone from being an unknown 21-year-old to Rome’s hottest celebrity, thanks largely to the (18) ________ (fame) of his *Pietà*, which proudly stood in the Basilica of Saint Peter in Rome. The dealer was thus happy to take it back, and had no trouble selling it on, now under the authorship of the suddenly famous Michelangelo.

Surrounded only by mountains and the sea, the remote town is so isolated that it’s only accessible by the North America’s longest one-way tunnel, which one stretches for two and a half miles. In Whittier all 218 residents live in one single multi-story building. The building several houses the town’s entire neighbourhood, including in the local police department, a school, two convenience stores, a laundromat and the post office. The local church performs baptisms in an inflatable pool in the same basement and children can enough easily knock on their teacher's door for homework help in the evenings. Most of residents work for the port as boat mechanics, but a few drive out to work outside the community.

Sheldon G:

I’m facing a dilemma: I’m in my senior year and I’m going to be given a car by my parents. You may feel that it doesn’t sound like a dilemma but things aren’t that simple. At the beginning of this term my mom and dad told me that if I maintained a B or higher in my classes and followed the rules of the school and the family and never got involved in anything illegal, they would buy me a second-hand car for graduation. Supposedly I’ve done just that and my proud parents will reward me next month with the promised car. The problem is the “supposedly” bit. I have a secret, and if I share it with my parents, I will certainly lose the car, among other things.

In February, two months after I received my license, I borrowed my parents’ car, had a few beers, and drove off the road into a fence. Instead of telling my parents what had happened, I called and told them I was staying over at a friend’s house. Then I slept off the beers in the car and headed home in the morning. When I got home I told my parents a deer had jumped into the road on my way home that morning. Our house is in a rural area and it’s quite common for deer to be on the road, so my parents bought my story without any further questions. What a relief! But, after a few days I started feeling pretty guilty. I’m considering telling them about the real reason I messed up the car, but I’m still hesitating for two reasons. The first is that I don’t want to let them down: they think I’m a reliable kid who always does the right thing. What a disappointment it would be to find out that I’m a liar! The second is that I really want that car. Badly.

What do you think?

What do you think about the importance of honesty in the family, if telling a lie can ever be justified, what you think Sheldon should have done, what you advise him to do now.
